Remarks: The rationale underlying the amendment of the National Energy Policy Council Act, B.E. 2535 (1992), is that there is no provision in the National Energy Policy Council Act, B.E. 2535, prohibiting a Member of the National Energy Policy Council from holding shares in a state-owned enterprise or assuming any post in a juristic entity operating an energy-related business. In order that a person who assumes such office could execute the duties in the manner that will not constitute a conflict of interest with the operation of energy-related business, the stipulation as regards such prohibition is required, and hence it is deemed essential to enact this Act.
